

ONE-PERSON DRAG/CARRY

KIT OR ARM DRAG

NOTE: While the Kit or Arm Drag may be a means to drag a casualty to cover or safety, it is not efficient for longer distances and increases the chance of causing further harm to the casualty.

NOTE: It should only be used when hostile fire gives the rescuer no other option.

01 **GRAB** the casualty by their equipment (e.g., drag handle, strap) or their arm.

NOTE: Some body armor is equipped with a drag handle. It is important that the equipment is fully strapped and secured onto casualty.

02 While walking backwards (in quick, short bursts), **DRAG** the casualty toward cover.

NOTE: Injury can occur to either the rescuer or the casualty during training drills; keep safety in mind.
