

TWO-PERSON DRAG/CARRY

KIT OR ARM DRAG

NOTE: Some body armor is equipped with a drag handle. The equipment must be fully strapped and secured onto the casualty.

NOTE: While the Kit or Arm Drag may be a means to drag a casualty short distances to cover or safety, it is not efficient for longer distances and increases chances of causing further harm to the casualty.

NOTE: This allows the rescuers to maintain a “weapons up” posture while executing the drag.

- 01 **ALIGN** yourselves alongside the casualty.
- 02 Each of you **GRAB** the casualty by their equipment (e.g., drag handle, strap) or their arms.
- 03 **DRAG** the casualty behind you going forward as quickly as possible in short bursts of movement.

NOTE: Injury can occur to either rescuer or casualty during training drills; keep safety in mind.
